PREVIOUS HACKATHONS

Bit n Build (28 to 29-1-2023)

- Our team successfully developed a web-based solution to the App/Web problem statement. Participation in this hackathon enabled us to network and enjoy the company of other participants. Through this experience, I gained knowledge and was honored to receive a certificate of participation as recognition for my efforts.

DUHacks 2.0 (18 to 20-2-2023)

- Participating in this online Hackathon was a thrilling experience as our team created an app-based solution for a challenging problem statement. Along with having fun, I gained valuable insights on managing a team in a virtual environment.

Clash of codes (4 to 5-3-2023)

- Our team was thrilled to be selected for the online mode, and we took the opportunity to create a dynamic solution for problem statement 1 of the web/app domain using Flutter-based application with Firebase as the backend. Working on this project was not only exciting but also an opportunity for me to learn a great deal about Git and its functionalities.

Hindi - Good level of proficiency.

English - Good level of proficiency.

Gujrati - Good level of proficiency.

PROFESSIONAL SUMMARY

I have prior experience in building Android apps and web development. In addition, I possess a basic understanding of Artificial Intelligence and have trained pre-configured models using Python. Moreover, I have experience working with the React, Angular and Django frameworks. Currently, I am developing a website for myself. I am also interested in exploring several advanced concepts such as microservices, the Internet of Things, blockchain technology, Kubernetes, and Docker.
